Mural recognizes Salish tradition

Dorothy Rogers, with West, was one of more than a dozen theatre students who helped designer West put the 3,300 pieces of the mural together

A mural, eight feet by 30 feet, designed by Bill West (Theatre) now adorns the wall at the entrance to the Chief Dan George Theatre in the Phoenix Building.

The mural, which contains the name of the theatre in western red cedar, is made up of about 3,300 individual blocks of wood which West and more than a dozen student cut and glued.

The design, approved by Chief Dan George's family, is based on a Salish basket motif representing lakes, valleys and mountains. "I felt it was an appropriate design to symbolize the land for which Chief Dan George had such reverence," explains West.

Glen Smith of Sooke Forest Products donated the cedar used in the mural and West calls it, "some of the finest cedar I've ever seen in my life." West points out that cedar was at the centre of the economic and cultural community of native peoples all along the coast. "Cedar was of such importance that it was an object of veneration and its use was preceded by ceremonies."

In 1982 West received approval for his design and began working part-time on the mural. "Many students participated, particularly in stage carpenter Martin Hykin's wood block production line and in the gluing crew. "There was a lot of cutting and handsanding."

For the mural the greatest woods of the rain forest are used, including spruce, douglas fir and the western red cedar, with a little western white pine and hemlock added.

No stain has been used, with the rich variety of color from the wood alone.

Total cost to the university of the impressive mural is less than \$1,000.

Children exploited in competitive sports says Dean

By Donna Danylchuk

Exploitation of children in competitive sports has reached unacceptable levels and should be countered by physical education administrators and managers, according to Dean John Jackson of the UVic Faculty of Education.

Jackson last month delivered the annual Prince Philip Fellows Lecture in the British House of Commons, at the request of the Physical Education Association of Great Britain and Northern Ireland.

In his speech, titled "Exploiting Children in Sport", Jackson cited numerous cases of exploitation which have occurred in Canada and the United States. Exploitation is taking place at all levels and comes from many sources including parents, coaches, teachers, entrepreneurs, media, equipment manufacturers, clothing manufacturers, diet faddists, politicians and others, he said.

His address to the 205 member audience called for physical educators to

take the lead in stopping the trend which is causing physical, emotional and psychological damage to many promising young athletes.

"Just as Lord Shaftesbury made the exploitation of children in factories illegal in the mid-nineteenth century, let the Physical Education Association lead the way in doing the same for children in sport in the 1980s," Jackson asked.

Jackson was recently a member of a group of 10 Canadian sport scientists charged with writing a multi-disciplinary paper on "Children in Competitive Sports", based on data gathered from research on safety and medical concerns, physical and motor development, and psychological and sociological well being.

The paper, to be published later this year, makes extensive recommendations based on its research findings. Jackson outlined 30 research findings in his

speech to the Physical Education Association, including the following:

- Chronological age is not sufficient criterion for partitioning children into homogenous groups. The differences in size and maturational level can result in situations which are detrimental to the child's sports development and are potentially dangerous.
- Expectation for sports performance should be downgraded during puberty.
- Sports equipment should be designed and constructed in accordance with size and growth characteristics of children.
- Fluid intake should be mandatory regardless of temperature during practice or competition and water restriction should never be resorted to as disciplinary measure.
- Coaches should not anticipate the same gains from young as from older children.
- Adults involved with competitive

sport programs for children must teach children to react to adverse situations through self-improvement and constructive behavior, rather than by means of aggressive behavior.

- Effort must be made to permit and encourage sport participation by all people, regardless of sex, race, age or economic status.
- Administrators must hire managers, coaches and teachers who will insist that all persons involved in children's sports display defensible moral behavior.

Jackson discussed the importance of applying moral values and judgements in the world of sport, and concluded that those responsible for supervising sports activities must take responsibility.

"If moral relativity is not to eat away the foundation of sport, its administrators must bear the heavy responsibility for right action," he stated.

Women tell their stories of economic hard times

Surviving in the face of severe economic hardship is a struggle faced by many women these days. A first-hand account of that struggle, by a group of women on Vancouver Island, is recorded in the handbook, *Women and Economic Hard Times*, produced by UVic and the Victoria-based Women for Economic Survival.

In the 66-page handbook published in November, women share their concerns and describe some of the individual methods they have developed and resource groups they have found to cope with hard times.

The majority of the women interviewed (85 per cent) have an income of less than \$1,250 a month and through interviews with them in the handbook, it is clear that meeting day-to-day needs is extremely difficult. The pressures on interpersonal relations that poverty brings are evident in the anonymous quotes from the women and in the statistics compiled from the answers to a questionnaire. More than 75 per cent of this group have children under the age of 12 and more than half are not living with male partners.

More than 190 women contributed to the handbook by recounting their experiences and providing information through the questionnaire about income, job status, housing, food and other basic needs.

The handbook was prepared with the aid of a \$10,000 grant from the Secretary of State, explains Brishkai Lund, coordinator of women's programs for University Extension. Lund and a group of women "from all walks of life" coordinated the project to help women in B.C. island communities who are experiencing hard times.

"We wanted to give these women an opportunity to share their concerns,"

explained Lund. "We also wanted these women to know they are not alone and to discover how others are coping."

"We want women to read the handbook and not feel guilty about the fact that they are poor, take a look at what other women do to cope and use the resources that are listed in the handbook."

Stella Lord of Victoria, chairperson of the group that undertook the research project, said one of the main concerns of the group is to get the handbook to women who are more isolated.

Because of the way we distributed the questionnaire, most of the women who responded to it were already in contact with an agency," she explained. "We had hoped for a cross-section response of women from all socio-economic groups, but what we received was primarily a response from those at the lower end of the economic scale."

"They are really having a difficult time."

Lord said copies of the handbook have been sent to MLAs and MPs. "We are hoping to get the message across about the seriousness of the problem."

The group has also applied for a Canada Works grant to look at some of the problems faced by these women and make recommendations for practical changes in the rules and regulations regarding such areas as unemployment insurance and income assistance.

Lund said the handbook concentrated on women because of the added burdens faced by women in times of economic restraint. "Poverty is not a new experience for women. What the recession and the accompanying policies of fiscal restraint in British Columbia have done, however, is to make an already difficult situation worse. To the traditional causes of women's poverty has been

Members of the Women for Economic Survival group clockwise from far head of table: Maureen Scobie, Brishkai Lund, Kashmir Aolick, Diana Butler, Lydia Kasianchuck, Stella Lord, and Anne Preyde.

added the problem of much higher rates of unemployment."

Lund points out that women are traditionally responsible for volunteer services and as cutbacks in services to children and the handicapped increase, women are expected to pick up the slack.

"Traditionally, women are also held responsible for certain family standards. Women are expected to keep up appearances even when the resources to do so are not available. And there is the whole stigma of welfare to contend with."

Along with the questionnaire, the research group met with 14 small groups of Vancouver Island women in Greater

Victoria, Duncan, Nanaimo, Port Alberni, Campbell River and Courtenay. "Frequently the women who took part in the discussions said that 'speaking out' made them feel better," said Lund. "They felt that they were not alone."

Women and Economic Hard Times is available for \$2 through the Women's Programs, University Extension, P.O. Box 1700, Victoria, B.C. V8W 2Y2.

Extension has scheduled an update of the research project March 5 at UVic at which the handbook will be discussed. Admission is free but participants must pre-register.

Biologist gets grant to study reproduction

By John Durkin

Dr. Nancy Sherwood (Biology) has received a two-year, \$74,000 grant from the Medical Research Council to do basic research on the evolution and synthesis of luteinizing releasing hormone, the main stimulus for reproduction in all vertebrates.

Luteinizing releasing hormone is synthesized in an area of the brain called the hypothalamus and is released into the blood vessels of the pituitary stalk. It acts on the pituitary to cause the release of two more hormones which in turn act on the gonads resulting in the maturation of eggs or sperm and the release of sex steroids. The pattern, after a surge at puberty, is cyclical in females and constant in males.

Sherwood's funding is a maintenance grant, to be used to purchase the supplies needed for her studies, plus a high pressure liquid chromatograph. The chromatograph will be used to isolate the hormone and determine its structure in different vertebrates.

In the past Sherwood analyzed the concentration of the hormone at various stages of maturity in the rat. As well, she spent a year at the National Institute of Health in Maryland working with other scientists there and at the Salk Institute

in California to determine the structure of the molecule in salmon.

Considerable practical importance is attached to luteinizing releasing hormone in salmon because fish farm operators have had great difficulty getting the female salmon to ovulate in captivity. "Once the structure of the salmon form of the molecule was known, the next step was to synthesize it and study the effects on ovulation," explains Sherwood.

Luteinizing releasing hormone is a short peptide made up of 10 amino acids. All vertebrates seem to have it although the form may vary slightly from species to species. Sherwood points out that "after 400,000,000 years of evolution the molecular structure of the salmon hormone varies from the human only by a change in one of the amino acids and a difference in placement for another."

The first stage of Sherwood's work on the Medical Research Council grant involves studying the evolution of these molecules in the lamprey, the oldest living vertebrate. Remarkably, the hormone in the lamprey may be even closer to the human than that of the salmon. A form close to that of the lamprey's could be the ancestral one for both the salmon and the human.

The second stage of the project will involve producing the synthetic forms of the hormones. "Once the synthetic forms are available, they can be tested on mammalian tissue cultures to determine their effects," Sherwood explains.

While it is always a big jump from studies with mammalian tissue cultures to uses in medicine, the results of such experiments could be an important first step. Synthetic forms of compounds related to luteinizing releasing hormone now are used in humans for the treatment of specific diseases.

They've got everything for the outdoors

Whether your interest is skiing, surfing, kayaking or another outdoor experience, the Outdoor Recreation Resource Centre at UVic can provide you with equipment and information you might require to keep active throughout the winter term.

Well planned programs, equipment rentals and sound advice on how to get the most of outdoor activities are all part of the ORRC's services.

"We want people to be aware of what the centre has to offer, and we also want them to have a good outdoor experience," says Chuck Francis, who became the ORRC co-ordinator last term.

Outdoor experiences offered through the ORRC cover activities from white-water kayaking weekends to windsurfing, or from cross-country telemarking to ski weekends at Mt. Washington or Forbidden Plateau. Rates for these events range from \$40 for a two-day telemarking theory session and day outing, to \$60 for full weekends including chalet accommodations at Mt. Washington and Forbidden Plateau.

Equipment rentals cover everything from axes to aerolites, from snow shoes to surfboards, at prices such as \$3 for a foam aerolite for a weekend and \$7.50 for

an inflatable, to \$5 and \$12.50 respectively for a week's rental.

New services offered by the Centre this term include equipment repairs and maintenance, and menu lists which will be distributed free of charge.

Group discounts of 20 per cent on equipment can be given to groups of eight or more people including an instructor, providing their group outing plan is reviewed and approved by Francis.

Off campus individuals and groups are welcome to use the ORRC's facilities, for an additional 25 per cent cost. If they get the 20 per cent group discount their costs are very close to those offered students, faculty and staff carrying recreation activity cards, points out Francis.

Details of all the programs, equipment and rates offered by the ORRC can be obtained in the latest edition of the *Rim Express*, the publication of the UVic Recreation and Intramurals Department which can be obtained at the McKinnon Centre and other outlets on campus.

Further information can be obtained by dropping into the ORRC in the Old Gym, or telephoning 721-8410.

B.C. participation rates are Canada's lowest

By Charles Gallagher

UVic's Office of Institutional Analysis has compiled up to date statistics on provincial enrolments both for universities and the total post-secondary system. Advocates of increased support for higher education have often cited the fact that B.C. enrolments are much less than would be expected on the basis of population.

In the belief that the figures are of general interest to the university community, the Ring has allowed me to show them here. The table entries give the number of full-time students per 1,000 population in the 18-24 year age group.

(A few notes are in order: The figures are given on a full-time basis since part-time college enrolments are not reported. The 1983/84 figures are subject to revision by Statistics Canada and those for 1984/85 are projections based on historical trends. The population figures, which underlie the calculation, are the most recent estimates from Statistics Canada. Those for the last two years are projections. In fact, the projections which give B.C. the smallest growth, (hence, the highest enrolment rate) from inter-provincial migration have been used.)

Full-Time Enrolment Per 1000 18-24 Year Population

I—University Only

II—University Plus University Transfer

III—University Plus All College

	1982/83			1983/84			1984/85		
	I	II	III	I	II	III	I	II	III
Atlantic	150	150	177	150	150	177	153	153	179
Quebec	108	192	275	111	194	275	115	197	278
Ontario	154	154	235	157	157	240	161	161	244
Prairies	117	123	161	124	130	169	127	133	172
B.C.	96	122	155	99	126	160	101	127	162
Canada	128	155	218	132	158	222	135	161	225

SOURCES: *Advance Statistics of Education (Catalogue no. 81-220) 1983/84*
Population Statistics from Projections Section of Statistics Canada

The results show that B.C. is last in all categories of enrolment in each year. (In particular, the Atlantic and Prairie provinces exceed B.C., though it has sometimes been maintained that the province is low only in relation to Quebec and Ontario.) In all of the cases, B.C. is between 20 and 30% below the national average.

Essentially the same things can be shown in comparisons of full-time equivalent university enrolments or university degrees on a per-capita basis. Anyone interested in more details should contact me at Local 8030.

Engineering adds adjunct professor

Dr. James Playford Duncan has been appointed adjunct professor in the Department of Electrical Engineering, following his retirement as professor and former head of the Department of Mechanical Engineering at the University of British Columbia.

His UVic appointment is effective Jan. 1, 1985 to June 30, 1986.

"Dr. Duncan is a distinguished scholar, author and researcher and we are delighted to have him associated with our department," said Dr. Andreas Antoniou, chairman of the Department of Electrical Engineering.

At UVic, Duncan will assist in the development of the new CAD/CAM centre established by Dr. G.W. Vickers and in programs of professional develop-

ment designed to encourage growth in British Columbia of the computer-assisted approach to manufacturing.

Duncan was born and educated in Adelaide, South Australia, where he graduated in mechanical engineering in 1941, obtaining his master's degree in 1954. Simultaneously, he studied music and was solo flautist for 20 years on Australian Broadcasting Commission programs. Since 1947 he has held academic appointments at the universities of Manchester, Sheffield, Pennsylvania State and British Columbia. He served for 22 consecutive years as administrative head of mechanical engineering departments in Sheffield and British Columbia.

He finds cuts 'unbelievable'

The possibility that the provincial government is considering a further cut to the university's operating grant is described as "unbelievable" by Dr. William Pfaffenberger (Mathematics), president of the Faculty Association.

"It seems unbelievable to me that the government would continue its cuts to UVic at a time when we are probably demonstrating our greatest contribution to the economy of B.C.," says Pfaffenberger.

"From 1979 to 1983, our enrolments increased by 33 per cent and the number of full-time employees increased by only 5.4 per cent. In fact, the total number of full-time employees at UVic has increased by only .6 per cent.

"This would seem to be the kind of productivity increases the government would be proud of. We have established a fine law school, we are starting an engineering school which is state of the art and we have increased our stature as a research institution. What more does the government want?"

Pfaffenberger pointed out that the government has removed the provincial grants from student aid. A UVic poll of students who inquired but did not register at any university in the fall of 1984 showed that about two-thirds of these students did not come because of lack of financing.

"This type of program cut only adds to the future unemployment in Victoria and in B.C. in general. Many of these people, instead of spending their time at university making themselves upwardly mobile in our society, are forced to go on welfare."

Pfaffenberger said at UVic, President Dr. Howard Petch, members of the Board of Governors and the Faculty Association have been attempting to get the government to see the damage which cuts in the budget, will have on the future of university education and the economy of the province.

From left, Claude Soulodre as J.J. Peachum, Janice Jackson as Polly Peachum and Jennifer Doyle as Mrs. Peachum rehearse for contemporary production of *The Threepenny Opera*

UVic opera goes downtown

For the first time, a production of UVic's School of Music is being performed at the McPherson Playhouse in downtown Victoria.

The University of Victoria Opera Ensemble and the UVic Orchestra will present an exciting modernized version of Kurt Weill's *The Threepenny Opera* Jan. 15, 18 and 19 at the McPherson.

Prof. Bernard Turgeon, director of the Opera Ensemble, explains that the School was invited to take a production downtown. "I think it's an excellent move to take our productions out to the community. It shows goodwill and it gives us an opportunity to provide a high-profile performance."

Turgeon adds that because of the quality of students we have, I have no hesitation about taking this production off campus. The UVic production will also travel to Duncan for a performance Jan. 26.

The opera is being presented at the McPherson as part of UVic's 21st Anniversary celebrations, with proceeds from the production to go towards the St. Jude Bursary for outstanding voice students at UVic.

The production will feature students who are currently enrolled in the UVic opera classes of Prof. Bernard Turgeon and Prof. Jean Letourneau. They will perform with the UVic Orchestra, conducted by Prof. George Corwin. Director is Glynis Leyshon.

This will be a contemporary version of the popular musical social satire, with action transferred from the slums of 1837 London to modern Soho.

Weill wrote the music and Bertolt Brecht the libretto for *The Threepenny Opera* which premiered in Berlin in 1928. Loosely based on John Gay's *The Beggar's Opera* of 1728, it features such colorful characters as Mack the Knife, Polly Peachum, J.J. Peachum, Jenny and Lucy.

Tickets for *The Threepenny Opera* are available at the School of Music, the McPherson Box Office, through the University Centre Box Office and at other outlets.

Calendar

Friday, January 11th.

Maltwood Art Museum and Gallery. *The Limners—Recent Work*. Continues until Jan. 20. Gallery hours are 10 a.m. to 4 p.m. Monday to Friday, 12 noon to 4 p.m. Sunday, and during evening events at the University Centre Auditorium. McPherson Library Gallery. *Maureen Enns—Horses*. Continues until Jan. 24. Library hours are 8 a.m. to 11 p.m. Monday to Thursday, 8 a.m. to 9 p.m. Friday, 10 a.m. to 6 p.m. Saturday, 10 a.m. to 10 p.m. Sunday. Registration for Spring Recreation & Intramurals classes continues until Jan. 18. Registration forms are available at the Athletics and Recreation Office, MCKI GYM.

9:30 a.m., Conclusion of the two-day colloquium *The Passionate Mind—Values and Commitment in Humanities' Teaching*. Senate & Board Room, University Centre.
10:30 a.m. Seminar presented by the Dept. of Electrical Engineering. Dr. D.T. Nguyen, Dept. of Electrical Engineering, Concordia University, will speak on "Research in Signal Processing and Filters Designs at the University of Auckland, New Zealand." LHUT 72.

12:30 p.m. Fridaymusic. Free noonhour recital featuring School of Music students. MUSIC BUILDING, RECITAL HALL.
2:30 p.m. Seminar presented by the Dept. of Physics. Dr. Harry W. Dosso (Physics) will speak on "Analogue Model Studies of Geomagnetic Induction in Coastal Regions (with examples from Canada, British Isles, China and Tasmania)." ELLI 061.

3:00 p.m. Basketball games. UVic Vikings host Canada West Tip-Off Tournament. Continues until Jan. 12.
5:00 p.m. & MCKI GYM.
9:00 p.m. The Health Information Science Program and Canadian College of Health Service Executives present Ken Fyke, President, Greater Victoria Hospital Society, speaking on "Integration and Merger: A Solution to Cost Containment." BEGB 157.

7:00 p.m. Basketball game. UVic Vikettes vs. University of Lethbridge. MCKI GYM.
7:15 p.m. Cinecenta films. *Koyaanisqatsi*. Admission charge. SUB Theatre.
9:00 p.m. Lansdowne Lecture Series. Prof. Michael O. Rabin, Senior Professor of Computer Science, Harvard University, Cambridge, Mass., will speak on "Randomizing Algorithms, The Uses of Chaos." Free and open to the public. CLER C112.

8:00 p.m. School of Music Faculty Recital—Lanny Pollet, flute, with Linda Hougland-Daniels, cello and Bruce Vogt, piano. Tickets are \$4, \$2 for Students, Senior Citizens and the Disabled. MUSIC BUILDING, RECITAL HALL.

Saturday, January 19th.

7:00 p.m. Basketball game. UVic Vikettes vs. University of Calgary. MCKI GYM.
7:15 p.m. Cinecenta films. *Koyaanisqatsi*. Admission charge. SUB Theatre.

Sunday, January 13th.

1:00 p.m. Weekly Sunday matinees presented by UVic Daycare Services.
3:00 p.m. *The Neverending Story*. Tickets are \$1.50 for Children, \$2.50 general admission. SUB Theatre.
2:30 p.m. Rugby game. UVic Vikings vs. Cowichan. McCoy Road Field.
7:15 p.m. Cinecenta films. *The Neverending Story*. Admission charge. SUB Theatre.

Monday, January 14th.

Last day for course changes in Faculty of Law.
2:30 p.m. Seminar presented by the Dept. of Political Science. Dr. Douglas A. Ross, Co-Director, Pacific Security Project, UBC, will speak on "U.S.-European Defense Policies and Strategic Inter-relationships." CORN A372.
3:30 p.m. Lansdowne Lecture Series. Prof. Michael O. Rabin, Senior Professor of Computer Science, Harvard

University, Cambridge, Mass., will speak on "Concurrency Control and Coordination Through Randomness." Free and open to the public. CLER A207.

Tuesday, January 15th.

12:30 p.m. The Learning and Teaching Centre presents Dr. E. Kluge to Centre presents Dr. E. Kluge (Philosophy) speaking on *Medical Muckraking: Ethical Issues in Health Care*. Learning and Teaching Centre. BEGB 131. For confirmation of attendance, contact the Learning and Teaching Centre (8571).
3:30 p.m. Lansdowne Lecture Series. Prof. Michael O. Rabin (see above) will speak on "Maximum Matchings Through Randomization." Free and open to the public. CLER A207.

Wednesday, January 16th.

7:15 p.m. Cinecenta films. Double feature. *The 400 Blows* (France 1958) and *Story of Adele H* (France 1975). Subtitles. Admission charge. SUB Theatre.
8:00 p.m. University of Victoria Opera Ensemble and Orchestra (Kurt Weill—*Threepenny Opera*). Presented as part of the University of Victoria's 21st anniversary celebrations, with proceeds to benefit the St. Jude Scholarship in Voice. Tickets are \$8.50; \$7.50; and \$6.50, with \$1 discount for Students, Senior Citizens and the Disabled. McPherson Playhouse. (Additional shows on Jan. 18 & 19.) University Women's Club of Victoria meeting, with Jean Kovich, author of *China Nurse*, speaking on "Nursing in China During the Revolution with Dr. Norman Bethune." CORN B112. All female graduates of any university are welcome.

Thursday, January 17th.

7:15 p.m. Cinecenta films. *Lawrence of Arabia*. Admission charge. SUB Theatre.

Friday, January 18th.

12:30 p.m. Last day for adding courses which begin on Jan. 9. All change forms must be deposited by 4 p.m. today at Records Services (undergraduates) or the Faculty of Graduate Studies (graduates).
12:30 p.m. Fridaymusic. Free noonhour recital featuring School of Music students. MUSIC BUILDING, RECITAL HALL. Faculty of Human and Social Development meets. CORN B145. The Learning and Teaching Centre presents a repeat of *Meetings Bloody Meetings*. Conference Room, AV & TV Services. For confirmation of attendance, contact the Learning and Teaching Centre, BEGB 131.
1:30 p.m. The Dept. of Psychological Foundations (Education) presents a workshop on "Remediation of Children's Errors in Written English" by Merrily Warren. No admission charge. BEGB 159.
3:30 p.m. James J. Asher, San Jose State University, and developer of the "Total Physical Response" approach to language teaching, will present a demonstrational workshop on his techniques. Tickets, available from University Centre A238, are \$15; \$5 for UVic students. CORN A121.
2:30 p.m. Seminar presented by the Dept. of Physics. Jane P. Wynne, Pacific Geoscience Centre, will speak on "Cretaceous Reversals and Tertiary Rotations in Sverdrup Tholeiites from Axel Heiberg Island, N.W.T." ELLI 061.
3:30 p.m. Faculty of Arts and Science meets. ELLI 167.
6:30 p.m. Basketball games. UVic Vikings & Vikettes vs. University of Alberta. MCKI GYM.
8:00 p.m. Cinecenta films. *The Hotel New Hampshire*. Admission charge.
9:15 p.m. SUB Theatre.

Saturday, January

2:30 p.m. Rugby game. UVic Vikings vs. Castaways. McCoy Road Field.
6:30 p.m. Basketball Games. UVic Vikings & Vikettes vs. University of Saskatchewan. MCKI GYM.
8:00 p.m. Cinecenta films. *Revenge of the Nerds*. Admission charge. SUB Theatre.
9:00 p.m. Theatre.
Sunday, January 20th.
1:00 p.m. Weekly Sunday matinees presented by UVic Daycare Services.
3:00 p.m. *Muppets Take Manhattan*. Tickets are \$1.50 for Children, \$2.50 general admission. SUB Theatre.
2:30 p.m. School of Music Faculty Recital—Bruce Vogt, piano. Tickets are \$4; \$2 for Students, Senior Citizens and the Disabled. MUSIC BUILDING, RECITAL HALL.
7:15 p.m. Cinecenta films. *Red Dawn*. Admission charge. SUB Theatre.
9:15 p.m. TBA Board of Governors meets.
7:15 p.m. Cinecenta films. *Marianne and Juliane* (Germany 1981). Subtitles. SUB Theatre.
8:00 p.m. School of Music Degree Recital—Laurel Thomson, horn (B.Mus.). No admission charge. MUSIC BUILDING, RECITAL HALL.

Wednesday, January 23rd.

12:30 p.m. The Faculty of Fine Arts presents Barrie A. McLean, filmmaker and lecturer, Depts. of Creative Writing and History in Art, speaking on "The Hidden Message in Popular Film." SUB Theatre.
7:15 p.m. Cinecenta films. Double feature. *The Wild Child* (France 1970) and *Such A Gorgeous Kid Like Me* (France 1973). Subtitles. Admission charge. SUB Theatre.

ringers

Frank Leonard, who is working on his master's degree in history at UVic, has been elected the youngest president in the history of the Greater Victoria Chamber of Commerce. Leonard took over as Chamber president Jan. 1. He and his father operate Victoria Tire.

Two professors in UVic's Faculty of Law have been appointed Queen's Council in the New Year's list announced by provincial Attorney-General Brian Smith. **Ron Cheffins** and Dean of Law **Lyman Robinson** received the honors awarded to those lawyers "recognized as leading lawyers, recognized as such by their peers and performing outstanding legal work".

A comparison of head count enrolment figures for December, 1984 with December 1983 reveals that total undergraduate and graduate enrolment in 1984 is down 5.6 per cent from 1983. There were a total of 10,719 UVic students in December of 1984, compared to 11,349 students a year earlier. Full-time enrolment is down only 2.8 per cent to 7,000 students while part-time numbers dropped by 10.4 per cent to 3,718 students. The figures are supplied by UVic's Office of Institutional Analysis.

Applications from undergraduate students studying a second official language are invited for the Queen Elizabeth Silver Jubilee Awards established by the federal government in 1977. Six such awards, worth \$5,000 each, are given annually, with each university allowed to nominate only one candidate. Applicants must have completed at least one year of a university program prior to the year of the award and must show sufficient ability in the second official language to pursue disciplinary studies in that language. They must have good academic standing and adequate motivation and adaptability. Candidates must be Canadian citizens or landed immigrants. The one candidate chosen by the university must be forwarded to the Association of Universities and Colleges, which administers the awards, by Feb. 15, 1985. Application forms and further information on the awards are available from the office of Nels Granewall, manager of Financial Aid Services.

The Association of Commonwealth Universities is offering Administrative Travelling Fellowships which provide unique opportunities for administrative officers of universities to visit other countries to study problems of importance to their own university. Candidates must apply no later than April 2, 1985, for the fellowships. Candidates should have at least five years continuous service in an administrative position. The fellowships normally are for not more than three months at a university in a Commonwealth country other than the candidate's. At least 30 such fellowships will be made available this year by the Association of Commonwealth Universities. More information is available from the office of UVic President Dr. Howard Petch or by writing to the Association at John Foster House, 36 Gordon Square, London, WC1H 0PF.

CFUV, UVic's radio station, has been on the air since Dec. 17 and holds its official opening ceremonies and open house today in the Student Union Building. Canadian musician **K.D. Lang** will cut the ribbon at 11 a.m. Dignitaries

from UVic, Saanich and Oak Bay will participate in the opening ceremonies. Everyone is invited to the station's open house from 11 a.m. to 5 p.m. CFUV now has a 49.4-watt transmitter and has been picked up at 105.1 on the FM dial as far away as Salt Spring Island. Broadcasting seven days a week from 7 a.m. to 3 a.m., it relies on volunteers from among students and the community at large for its programming. Aiming at providing "the best programming available to Victoria" CFUV welcomes faculty or staff who wish to provide commentary for air use.

Social Sciences and Humanities Research Council (SSHRC) Leave Fellowships have been granted to seven UVic faculty members. Those receiving Leave Fellowships include **Dr. K.R. Bradley** (Classics), **Dr. C.M. Gaffield** (History), **Dr. J.P. Oleson** (Classics), **Prof. R.M. Brown** (Law), **Prof. R.I. Cheffins** (Law), **Dr. J.B. Bavelas** (Psychology) and **Dr. R.D. Gifford** (Psychology).

First prize winner in Creative Writing's 21st Anniversary poetry contest is **Michael C. Kenyon** with *Ring Road*, a narrative poem about an encounter on the Ring Road. Kenyon, who attended UVic from 1978 to 1981, wins \$150. He has had prose and poetry published in numerous Canadian periodicals and drives a cab in Victoria to support himself. Book prizes were awarded for honorable mention to Tony Cosier, a 1968 UVic grad for *As a Raven* and to *Derek Hanebury*, a Creative Writing student, for *Relaxed in the Stacks*.

UVic has a newspaper recycling service. A drop-off box for bundled newspapers is located in the parking lot adjacent to the Campus Shop. The recycling service is operated by the Vancouver Island Recycling Society.

Preliminary enrolment data tabulated by Employment and Immigration Canada indicate a dramatic decline in visa student numbers at Canadian universities, particularly in Ontario and Quebec. There are about 5,000 fewer international students in the university system in Canada this year, 31,000 compared to 36,000 in 1983-84. The drop is most evident at the first-year level and provinces with no or low differential fees have experienced the least decline. According to one analyst, the drop in visa numbers, combined with a seven per cent decrease in 18-year-old Canadians attending university, may partly explain the decline in first-year enrolments across the country.

Dr. Arthur Kratzmann, former dean of the Faculty of Education, is a member of the Provincial School Review Committee, established by the Ministry of Education to facilitate discussions on revisions to the School Act. Education Minister **Jack Heinrich**, in November, issued a discussion paper titled *Let's Talk About Education* which will be used as the basis for discussion. Public meetings are planned for February, with the committee accepting briefs up to March 15. The committee has established a "hot-line", 742-6164, for committee members at UVic. The hot-line will be staffed by graduate students from 11:30 a.m. to 4:30 p.m. until March 1, with the students working under the direction of Kratzmann.
